Knowing Organization? Learning Organization?

Organizational Knowledge Creation....

WHAT IS IT?

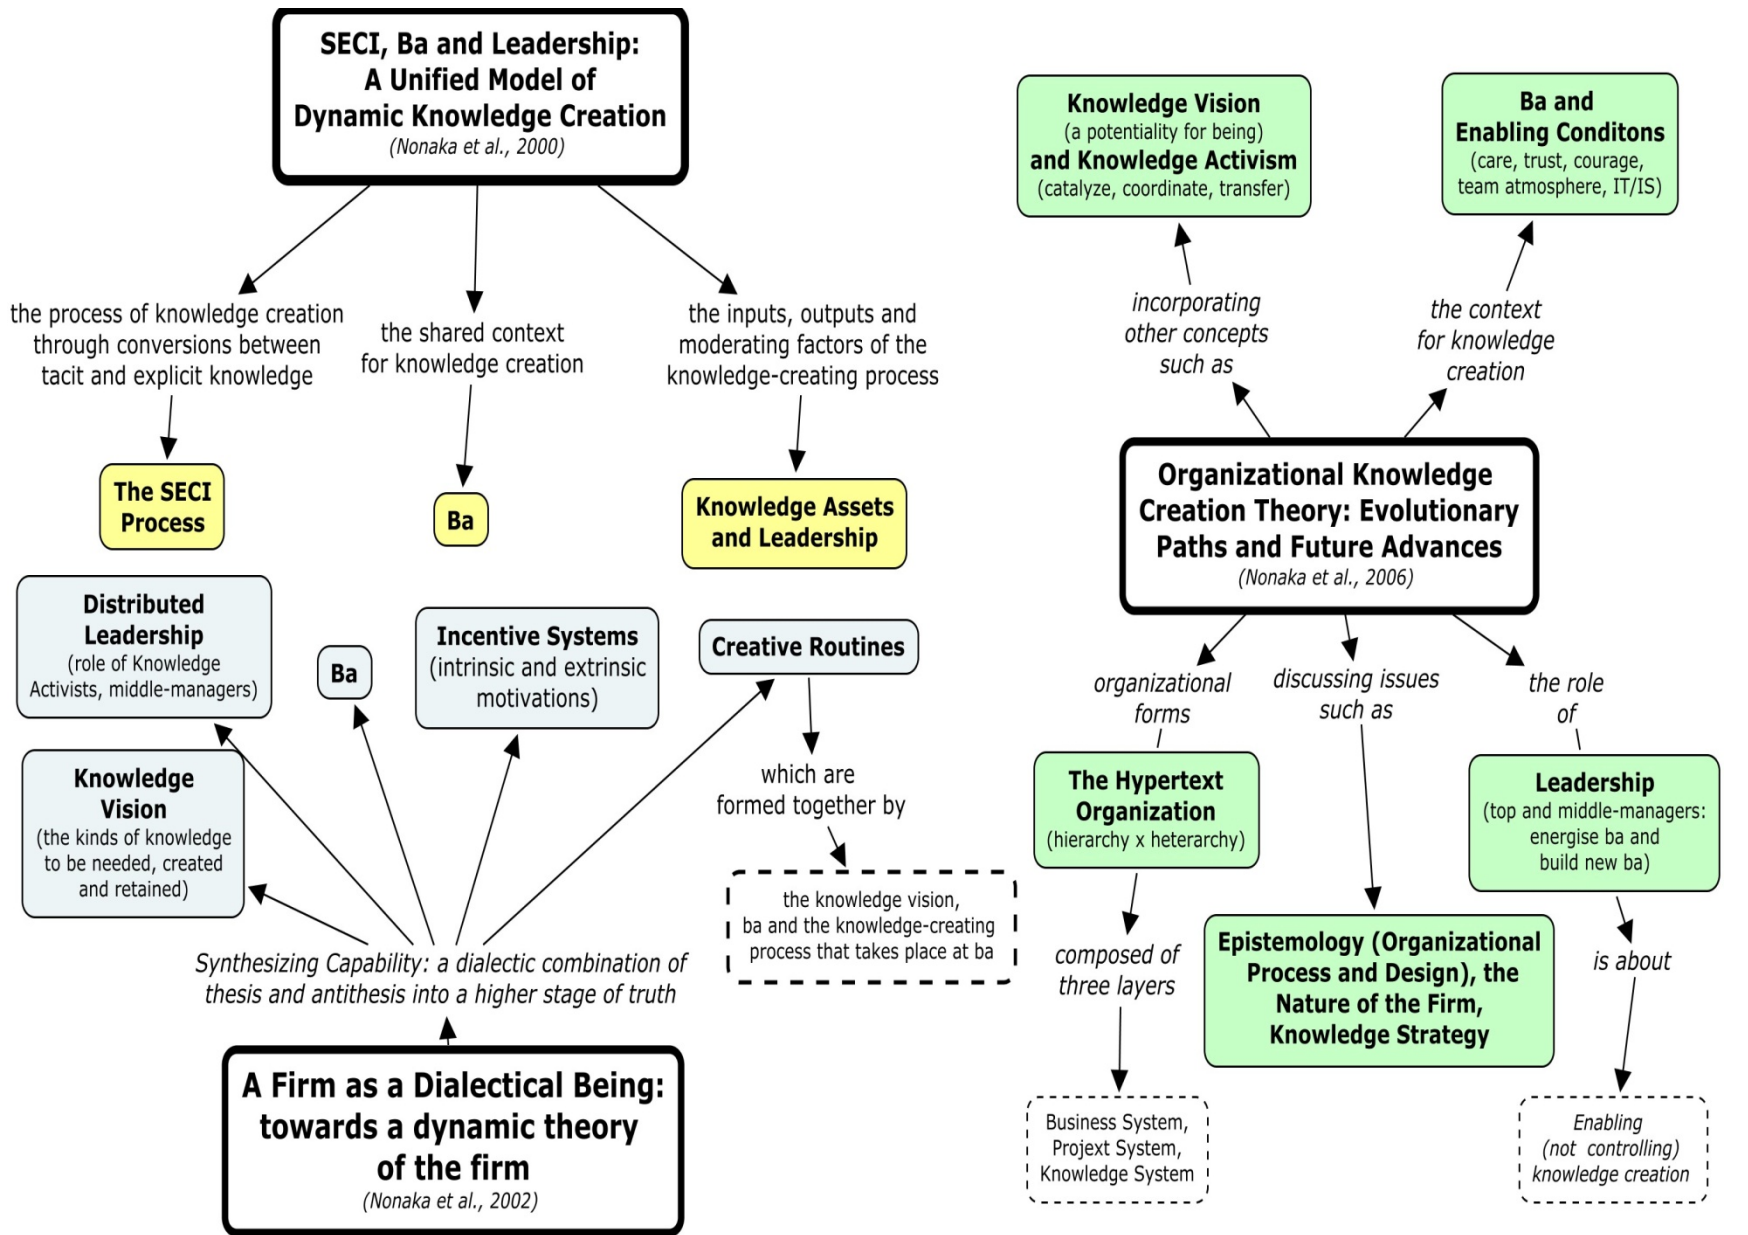

- a fragile organizational process, particularly towards the nature of knowledge itself:
 - fluid, dynamic, intangible... (measurement x assessment)
 - tacit and explicit, embodied in individual and groups,
 - socially constructed, and constrained by individual and organizational barriers

- Knowledge is approached through a constructionist perspective, as human cognition is not an act of representation and not just a machine for information processing and logical reasoning.
- In the constructionist perspective, cognition is an act of construction and creation (MATURANA and VARELA, 1987), as well as knowledge is tacit, explicit and cultural (CHOO, 1998).
- Knowledge resides in one's cognition as well as in between creative heads with synergetic purposes.

STRATEGY**EXECUTION****TOOLBOX**

CHOO (1998)

The Knowing Organization Model

1. Sensemaking**2. Knowledge creation:***organizational learning
and Unlearning***3. Decision-Making:***bounded rationality
principle*

Can the world be analyzed and predicted?

Un analyzable, unpredictable	<h3>Responding</h3> <p>If you see chance, take it! Listen to opinion leaders. Adapt, go for quick wins.</p> <p>Long term innovation doesn't make much sense.</p> <p>E.g. small organizations</p>	<h3>Enacting</h3> <p>Change the rules! Experiment, imagine, prototype, learn.</p> <p>Analysis of existing market doesn't make much sense.</p> <p>E.g. Designers</p>
Analyzable, predictable	<h3>Analysing</h3> <p>Analyze, measure, use hard quantitative data! Innovation is just execution.</p> <p>If it can't be measured, it doesn't make sense.</p> <p>E.g. business analysts</p>	<h3>Discovering</h3> <p>Think before you leap! Rigorous analysis, combined with technology assessment.</p> <p>If it isn't rational, it doesn't make sense.</p> <p>E.g. management books and high level managers</p>
Passive		Active

Attitude: can an organization change the future course of events?

The Four Major Groups of Enabling Conditions

- care, mutual trust, lenience in judgment, active empathy, courage and access to help,
- tolerance to "honest" mistakes and mutual respect
- attentive enquiry, open dialogue and autonomy of freedom

- internet, intranet, yellow pages, best practices and lessons learned
- information systems designed to support collaboration, coordination and communication
- computer simulation and virtual communities of practice

norms and values that guide relationships and interactions

IT/IS/IM
Information and Communication Tools, Systems, Applications, Processes

Social/ Behavioral

Informational

Business/ Managerial

Cognitive/ Epistemic

each type of ba demands a combination of different groups of enabling conditions, in different levels of interactions and in different types of knowledge processes

different issues to be taken into account or practical processes applications

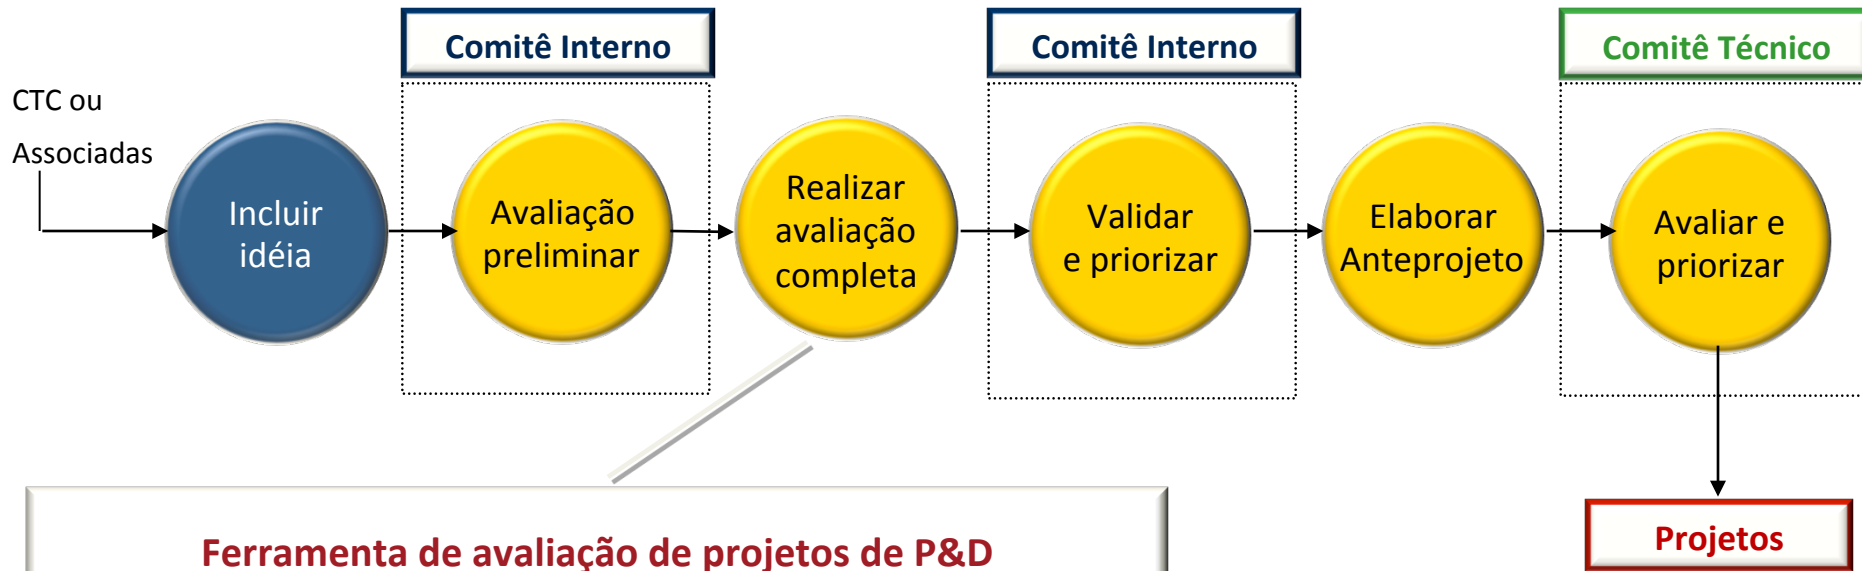

common knowledge or shared epistemic values and commitments

- **Structure:** project teams, empowered divisions hypertext organization,
- **Culture**
- **Processes:** salesforce management, supply-chain, finance, networks
- **HRM and Organizational Learning:** reward systems linked to knowledge processes
- **Architectural Innovations:** layout environments, meeting/sharing spaces
- **Emergence of Knowledge Activists:** project managers, CEO, CKO
- **Leadership:** styles, roles, top and middle-managers,
- **Strategy and Knowledge Vision**

- exposure to a great variety of data, insights, questions, ideas and problems
- existence of a sound mix of people with diverse perspectives, backgrounds, mental models and functional areas
- existence of formal and informal groups or communities with their own rituals, languages, norms and values
- creation of shared spaces and shared goals
- development of common knowledge and dialectical thinking

Beyond the ba: managing enabling contexts in knowledge organizations

Document Information:

Title: Beyond the ba: managing enabling contexts in knowledge organizations

Author(s): Chun Wei Choo, (Professor in the Faculty of Information, University of Toronto, Toronto, Canada), Rivadavia Correa Drummond de Alvarenga Neto, (Professor at Fundação Dom Cabral (FDC), Nova Lima, Brazil)

Citation: Chun Wei Choo, Rivadavia Correa Drummond de Alvarenga Neto, (2010) "Beyond the ba: managing enabling contexts in knowledge organizations", *Journal of Knowledge Management*, Vol. 14 Iss: 4, pp.592 - 610

Keywords: Knowledge management, Knowledge organizations

Article type: Research paper

DOI: 10.1108/13673271011059545 (Permanent URL)

Publisher: Emerald Group Publishing Limited

Acknowledgements: Rivadavia C.D. de Alvarenga Neto wishes to thank Brazil's FAPEMIG (Fundação de Amparo à Pesquisa do Estado de Minas Gerais), and FDC (Fundação Dom Cabral) for their support for this study and his post-doctoral research at the University of Toronto, Canada.

Received: 29 October 2009. Accepted: 19 February 2010

Abstract:

Purpose – Looking at the practical experience of organizations pursuing knowledge management, it is found that their efforts are primarily focused on creating the conditions and the context that will enable knowledge creation. This need for developing enabling conditions and contexts was identified more than a decade ago when Nonaka and associates introduced the concept of “ba.” This paper aims to map the development of the concept of “ba” in a number of disciplines in order to understand its theoretical evolution and practical application.

Design/methodology/approach – A comprehensive search and evaluation of the literature resulted in a database of 135 papers, four dissertations and four books. Using content analysis, citation analysis, and concept mapping, four categories of research findings are identified that in turn suggest four groups of conditions for enabling knowledge creation.

Findings – The paper discusses each of these conditions (the social/behavioral, cognitive/epistemic, information systems/management, and strategy/structural), and introduces a framework that relates these conditions to the type of knowledge process and the level of interaction that characterize a knowledge management activity in the organization.

Originality/value – It is concluded that managing knowledge in organizations is fundamentally about creating an environment in the organization that is conducive to and encourages knowledge creation, sharing and use. Organizations interested in pursuing knowledge management and innovation may wish to be guided by the enabling conditions presented here that have been discovered over ten years of research. These conditions and the frameworks of which they are part can help managers to analyze, discuss, and introduce specific combinations of enabling factors that are tailored according to the type of knowledge process and level of interaction needed to address a particular knowledge problem or vision.
